## MASSETER BOTOX

BEFORE

AFTER

Masseter Botox not only slims the jawline but also alleviates jaw pain associated with TMJ. Masseter Botox targets the overactive masseter muscles responsible for clenching and grinding. Botox injections can relax these muscles, reducing tension and discomfort. It significantly improves symptoms such as jaw soreness and headaches. Masseter Botox also sculpts the jawline. It creates muscle atrophy over time, resulting in a slimmer and more contoured jawline. This non-invasive approach provides natural-looking results with no downtime. Call us today for your appointment 919-521-8282.
