Hair Restoration

Results after three treatments of EZPRF combined with Anteage.

We love to see these natural, beautiful and safe hair restoration results after EZPRF! It's designed to regrow and restore hair. This patient experienced undesired hair loss on her hairline and part. EZPRF Hair Restoration used her own blood to retrieve growth factors, white blood cells, stem cells and fibrin. Natural fibrin holds growth factors in place in the scalp. It aids in regeneration and tissue repair while activating follicle growth. Book your Consultation today with Meredith or Heather.

Refreshed, renewed and rejuvenated! A full-face restoration gave this client a subtle, yet overall youthful appearance. Her natural looking results were achieved by using Juvederm Volux to define and improve the jawline. Juvederm Voluma was used to add volume to the cheek area. Juvederm Vollure was used to enhance the lips and soften lines. Altogether, Meredith added just enough volume to keep her looking natural and timeless.
