Dual Benefits of Masseter Botox

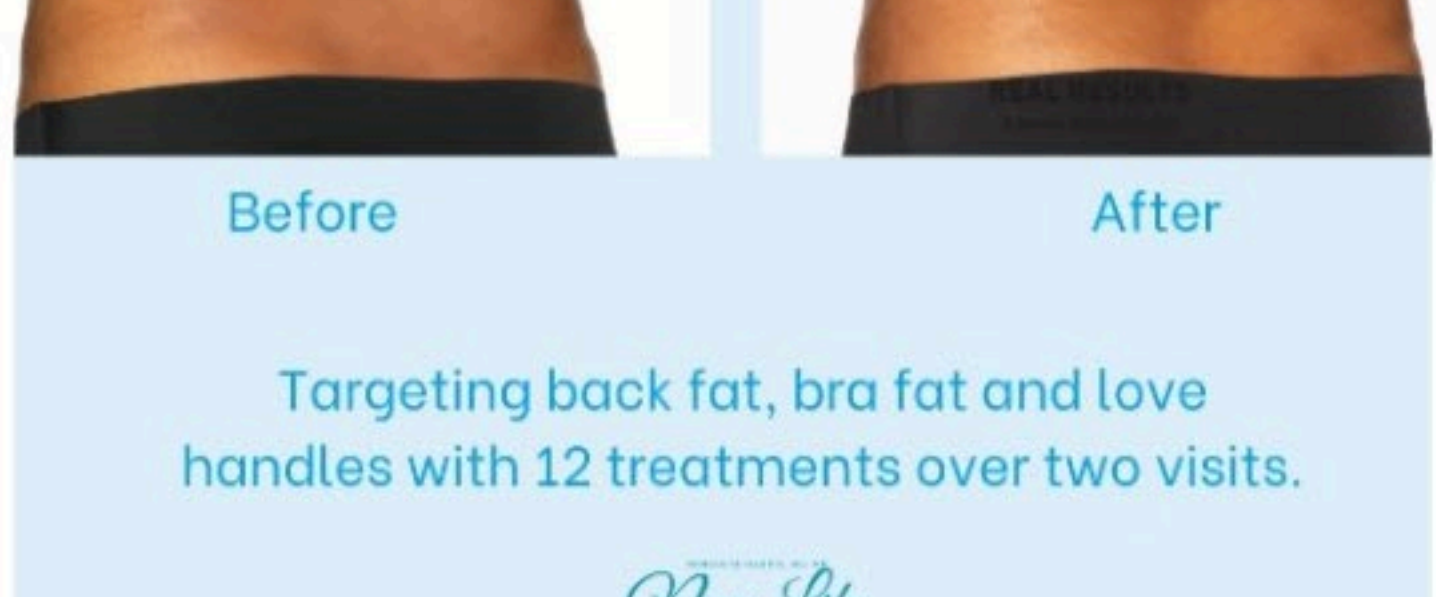

Masseter Botox

Masseter Botox offers a range of benefits that can enhance both your appearance and well-being. Botox slims the jawline and alleviates jaw pain associated with TMJ. This client came to us with immense jaw pain. He received Botox consistently for one year. The results contoured his jawline by reducing the size of the masseter muscles. It significantly improved symptoms such as jaw soreness and tension headaches by relaxing the muscles responsible for clenching and grinding. This slimmer, contoured jawline is a result of muscle atrophy over time. There's no downtime for these natural looking results. Call us today for your appointment 919-521-8282.
